Professional Summary

Backend Engineer with 3+ years of experience building scalable backend services and REST APIs using Node.js, NestJS, TypeScript, MySQL, PostgreSQL, Redis, BullMQ, Prisma, and AWS S3. Experienced in microservices, distributed systems, caching, asynchronous processing, authentication, authorization, database optimization, and cloud-based architectures. Proven track record of owning backend systems end-to-end and delivering production-ready solutions in fast-paced SaaS environments.

Technical Skills

Node.js, NestJS, Express.js, TypeScript, JavaScript (ES6+), MySQL, PostgreSQL, Prisma ORM, Redis, BullMQ, REST APIs, Microservices, JWT, RBAC, AWS S3, Docker (working knowledge), CI/CD, Git, Jest, SQL Optimization

Professional Experience

Senior Backend Developer – Candy Technologies Pvt. Ltd. | Jun 2023 – Present

- Designed, developed, and maintained scalable backend services and REST APIs using Node.js, NestJS, TypeScript, Prisma, and MySQL.
- Built high-performance server-side applications supporting workforce management, document management, and invoicing modules.
- Implemented Redis caching and BullMQ message queues to improve scalability and asynchronous processing.
- Developed secure authentication and authorization systems using JWT and RBAC.
- Optimized SQL queries, database schemas, and application performance for production workloads.
- Integrated third-party services, AWS S3 storage, notifications, and cloud-based workflows.
- Participated in architecture discussions, debugging, production support, and technical planning.
- Collaborated with frontend, QA, and product teams to deliver end-to-end features.

Key Achievements

- Built and maintained the complete backend architecture of SyncOffice, a multi-tenant SaaS platform.
- Designed scalable cloud document management workflows supporting uploads, downloads, restores, and storage tracking.
- Implemented asynchronous processing systems using Redis and BullMQ.
- Improved performance through query optimization, caching, and scalable backend design.

Projects

SyncOffice Platform – Enterprise SaaS platform built using Node.js, NestJS, Prisma, MySQL, Redis, BullMQ, and AWS S3.

NxtTrendz E-Commerce – Amazon-inspired e-commerce application with authentication, search, filtering, and product management.

Movies App – Netflix-style streaming application with content discovery and responsive UI.

Education

NxtWave Disruptive Technologies – Industry Ready Certification in Full Stack Development
Vidya Vikas Engineering College – Diploma in Mechanical Engineering

Certifications

Full Stack Development, React JS, Node JS, JavaScript Essentials, Introduction to Databases
